INVESTOR OPPORTUNITY

Apollo St Mary’s Hospital
Tenkasi • Strategic Healthcare Investment

A proposed investor participation opportunity linked to ILVORA Healthcare’s interest in the hospital project. This document is a discussion brief, not a binding offer.

■35 Cr	■5 Cr	14.29%
Stated value of ILVORA interest	Proposed investor amount	Indicative proportion of stated value

Confidential • Prepared for preliminary discussion and independent due diligence

1. Investment structure at a glance

The proposal is to invite an outside investor to invest ■5 crore in connection with a partial sale of ILVORA’s interest only. St Mary’s Group’s interest is not proposed to be sold under this structure.

Indicative arithmetic only; final ownership depends on legal structure, valuation and transaction documents.

Item	Proposal basis
ILVORA stated interest value	■35 crore (as supplied for this proposal)
Proposed investor amount	■5 crore
Simple indicative ratio	■5 crore ÷ ■35 crore = 14.29%
Scope of sale	Part of ILVORA’s interest only; St Mary’s interest excluded
Final ownership	Subject to title, shareholding, valuation, approvals and definitive agreements

Important: 14.29% is an arithmetic ratio against the stated ■35 crore value, not a confirmed legal ownership percentage or promise of returns.

2. Hospital concept and service model

The source proposal describes a multi-specialty hospital concept with a planned 100-bed capacity and potential future expansion. All site, construction, licensing, equipment, bed-capacity and readiness statements should be independently verified before investment.

*Service availability and equipment plan to be confirmed during due diligence.

Proposed clinical service lines

• General Medicine	• General Surgery	• Emergency Medicine
• Orthopaedics	• Obstetrics & Gynaecology	• Paediatrics
• Cardiology	• Nephrology	• Visiting Neurology
• Dental	• Dermatology	• Diagnostics / support services*

*Final departments, specialist availability, diagnostics and commissioning sequence depend on operational planning, staffing, statutory approvals and verified demand.

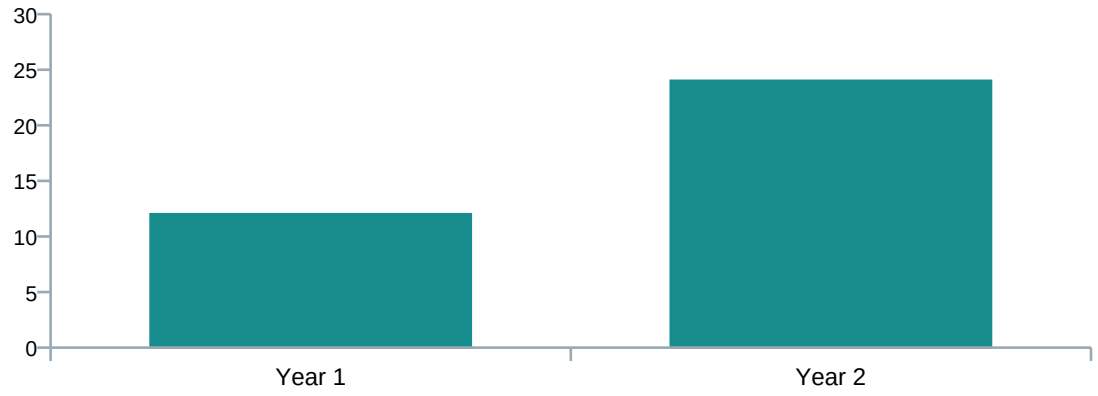

Why a service-line approach?

A coordinated emergency, outpatient, inpatient and specialty model can support referrals and continuity of care. Commercial viability will depend on catchment demand, doctor availability, payer mix, pricing, referral patterns, operating costs and execution.

3. Financial outlook — illustrative, not guaranteed

The strategic memorandum supplied for this project describes Year 1 as a stabilisation / “cool-off” period with a no-profit–no-loss target, followed by a Year 2 annual net-profit projection of ■24 crore. These figures are proposal assumptions only and are not independently validated.

Illustrative annual net-profit scenario (■ crore)

Year 1: stabilisation target; Year 2: proposal projection only — not guaranteed.

Illustrative Year 2 split shown in the source memorandum

■24 Cr	50%	■12 Cr
Projected annual net profit	Illustrative partner split	Indicative share per partner

These projections must not be presented as guaranteed earnings. Actual distributable profits, if any, depend on audited results, occupancy, collections, operating expenses, taxes, debt service, working capital and board/shareholder decisions. No dividend or monthly payout is promised by this document.

Due-diligence checklist before commitment

- ■ Independent valuation and review of land/building ownership, encumbrances and title.
- ■ Verification of project approvals, hospital licences, fire safety, pollution control and other statutory permissions.
- ■ Construction and equipment status, vendor quotations, commissioning timeline and capex gap.
- ■ Detailed monthly operating model: staffing, salaries, consumables, utilities, maintenance and working capital.
- ■ Market/catchment assessment, competing hospitals, realistic patient volumes and specialty coverage.

Profit sharing proposed to commence from Year 2 onwards

Illustration assumes ■24 crore annual profit available for distribution after expenses and a 50:50 partner split.

■12 crore	14.29%	■14.3 lakh/month
Annual profit-share pool for ILVORA’s 50% side	Illustrative share of ILVORA’s interest	Estimated investor profit share

Calculation: ■12 crore × 14.29% ≈ ■1.714 crore/year ≈ ■14.3 lakh/month.

Indicative only—not guaranteed. Actual distributions depend on audited results, cash flow, reserves, taxes and the final investment agreement; no fixed monthly payment is promised in this proposal.
